// YOUR CHALLENGES

Do you need a long-term storage facility for your pathology samples, but the scarce space, high rents and time-consuming processes pose a challenge? No problem!

Z.A.S. Zentral Archiv Service GmbH offers support in this area and lets you concentrate fully on your core business again.

// OUR SOLUTIONS

We offer pathologists and laboratories temperature-monitored, data protection-compliant archiving solutions for your samples from diagnostic or (pre-)clinical research and for your documents and digital data.

We offer an all-inclusive service. We take care of the repackaging of the samples to be taken over for our customers, store them long-term and, if desired, also take care of the professional destruction and disposal of the samples in accordance with the legal requirements within Rhenus/Remondis Group.

We pay attention to the wishes and requirements of our customers at all times. For example, you can obtain a transparent overview of stocks at any time via our online portal and request the samples you need within a short time.

OUR PORTFOLIO FOR ARCHIVE GOODS COMPRISES:

- Paraffin blocks, sections (microscope slides) and x-rays
- Wet specimen (WetTissues), fixed organic material
- Specimen material in accordance with the Infection Protection Act, tissues, blood, cell banks, organs and reserve samples, to be stored isothermally at about 2 - 8 °C, -20 °C, -80 °C or down to -196 °C
- Retained samples and active substances at room temperature or as temperature-controlled stable storage between 25 °C and 40 °C
- Electronic raw data as storage media or digital data for long-term archiving
- Web archiving of histological image data

OUR SUPPLEMENTARY SERVICES COMPRISE:

- Provision of free sample cabinets and disposal as soon as they are full (with corresponding minimum contract period)
- Registration when samples are lent to your authorized employees and tracking of their timely return
- Direct shipment of consumables to your senders on your behalf
- Level check and refilling of wet specimen in our archive's own microbiological laboratory
- Digitization of documents or slides
